ENVIRONMENTAL POLICY

We are consistently developing and improving our production processes at TS PCB Techno-Service S.A. in order to meet our customers' expectations in terms of ecology and sustainable environmental protection. We are aware of our impact on the natural environment and we are devoted to making every effort to achieve the adopted environmental goals. Under the Environmental Policy, we intend to reduce the impact of printed circuit production process on the natural environment.

The Environmental Policy is implemented through:

- ✓ rational and economical management of raw materials, resources, water, electricity and heat;
- ✓ waste segregation;
- ✓ the use of technology for the treatment of discharged post-production sewage, monitoring its purity degree and taking immediate corrective actions in the event of non-compliance with the required parameters;
- ✓ waste minimization and environmentally safe waste management through production process optimization as well as segregation, storage and transfer of waste for processing or utilization;
- ✓ new technology implementation at the launch of new investment or modernization tasks, with economic and environmental factors taken into account;
- ✓ compliance with the requirements of legal provisions of environmental protection.

We are committed to continuous improvement of the quality management system according to PN-EN ISO 14001:2015. The management declares close cooperation in the implementation of the Environmental Policy by raising employees' awareness of their importance in the production process and environmental protection activities.

The implementation of the Environmental Policy contributes to strengthening the high market position and good reputation of the company, raises customer satisfaction and leads to higher sales through positive image of a company able to reach the highest quality standard while caring for the natural environment.
